

FORESTRY HOSE

187 Forestry

Polyester Single Jacket Forestry Hose

Meets USDA Forest Service Specifications

Our Type 187 forestry hose is a lightweight, all-synthetic fire hose with a polyurethane lining inside a polyester jacket designed to meet the USDA Forest Service specification 5100-187 for "Synthetic Lined" fire hose.

Available in two styles, 7F and 8F, Style 7F is ideal for traditional Type 1 specifications; while 8F meets the new "Type II" specification-and is protected from mildew and no drying is required. Type 187 8F also is available with our exclusive Dura-Cote™ treatment, greatly increasing abrasion, heat, and flame resistance while virtually eliminating water pick-up.
